NC Digital Learning Plan - Initial Information Gathering

North Carolina is committed to ensuring that all students throughout the state have equitable access to high quality digital learning. Recent legislative actions addressing the preparation of educators for digital learning, providing digital resources, and ensuring technology access across all schools, as well as actions and plans of the State Board of Education, necessitates the development of a digital learning plan to facilitate and accelerate North Carolina's progress.

The Friday Institute for Educational Innovation at North Carolina State University, in collaboration with policymakers, education leaders, practitioners, business leaders and other partners throughout the state, has been asked to develop the North Carolina Digital Learning Plan. As part of that work, the information collected via this survey will allow us to gain insight into the current landscape of digital learning in our schools and districts. No personal or school-level identifiers will be used when reporting these data.
